BUILT BUSES

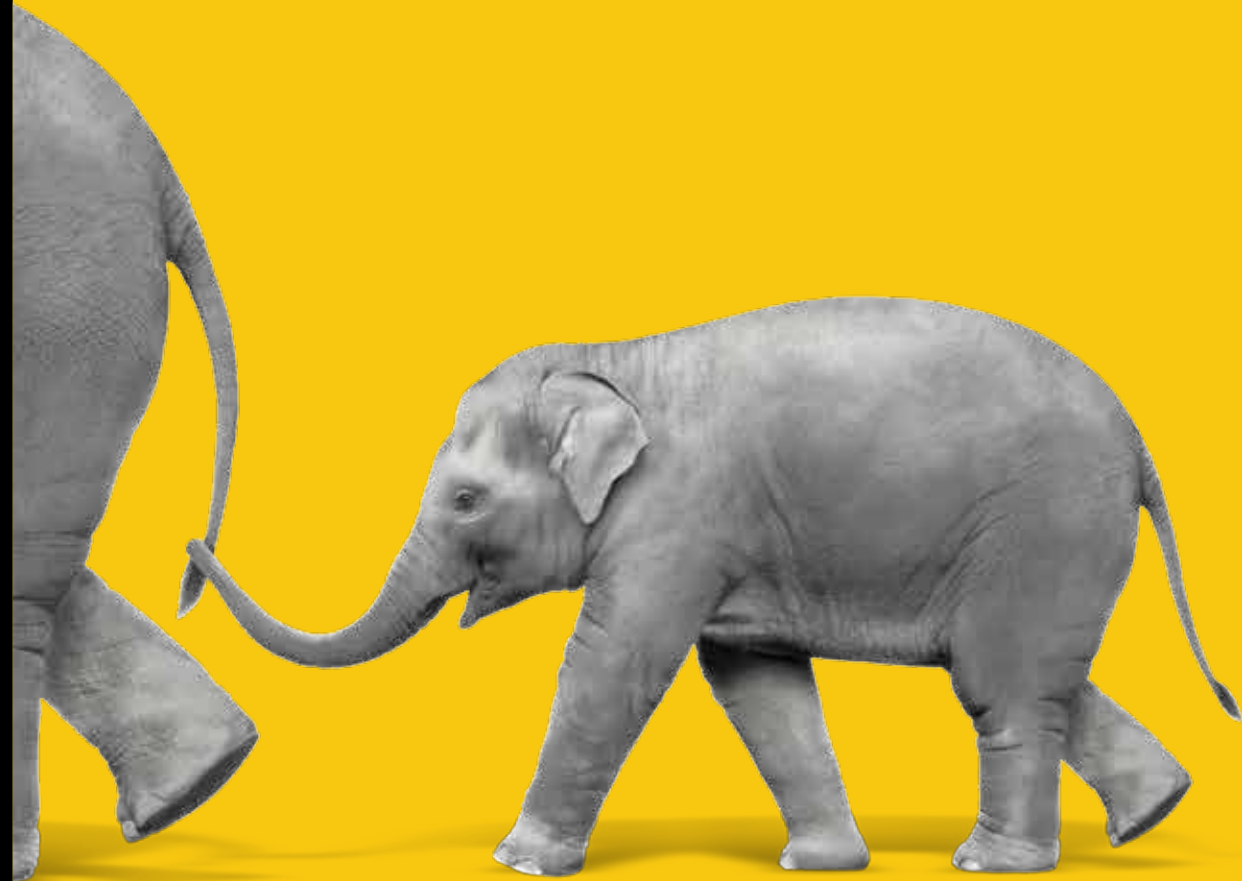

Because every mile matters.™

Minotour®

EASILY CONFIGURED FOR ALL OF YOUR TRANSPORTATION NEEDS.

**BUILT JUST AS STRONG
AS BIGGER MEMBERS OF OUR FAMILY.**

At Thomas Built Buses, our mission is to provide transportation options that enable you to operate more efficiently. Our Minotour® bus offers flexibility without sacrificing safety or features. It truly is a big bus in a compact package – with safety cage body construction, one piece skirt-to-skirt roof bows and internal roof crash rails for rollover protection. As a result, this rugged bus meets all Federal Motor Vehicle Safety Standards for school buses.

The Minotour also offers a variety of benefits – from ergonomic driver controls and a Saf-T-Vue window to seating options for up to 30 passengers and easy serviceability. It can be equipped with a wheelchair lift, various seat options and flexible track seating. Put simply, the Thomas Minotour offers a lot of bus in an efficiently designed package. And that's huge.

Keep your passengers in sight while loading and unloading. Our Saf-T-Vue window offers 306 inches of glass next to the entrance door.

SAF-T-VUE WINDOW

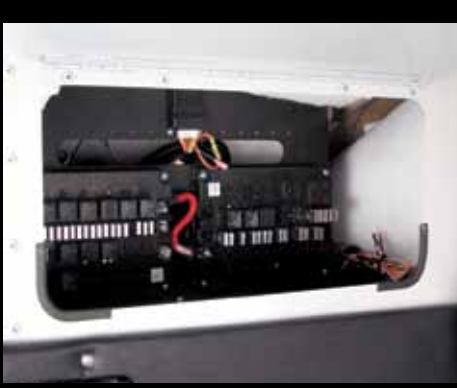

It's important to keep drivers comfortable and safe. Our cockpit is designed to accommodate all drivers with a driver-friendly interior and instrument panel.

ERGONOMIC DRIVER COCKPIT

OVERHEAD DRIVER CONTROL PANEL

The driver switch panel is conveniently located overhead and allows for an unobstructed view of the Saf-T-Vue window.

The electrical system was designed with your convenience in mind. Removable panels and printed circuit boards located above the driver's seat provide quick and easy access to the LED diagnostics and circuit breakers, electrical components and wiring.

EASY-TO-ACCESS ELECTRICAL SYSTEM

Continuous skirt-to-skirt 14-gauge roof rafters and roof crash rails and a 12-gauge (3/16") concave rear bumper are just a few features that make this bus sturdy and safe. Aluminum side sheets and steel exterior rub rails provide additional reinforcement.

STURDY STEEL CONSTRUCTION

REARVIEW BACKUP CAMERA

Expands driver's visibility while backing up, providing a safer environment for everyone inside and out. This optional monitor is conveniently built into the rearview mirror.

BODY MASTER CIRCUIT BREAKERS

Service and operator personnel have easy access to the secure body master circuit breakers when troubleshooting or to stop battery drain for vehicles that are parked for extended periods. Resetting is quick and easy.

PLENTY OF STORAGE

We offer standard storage conveniently located above the driver area for personal items and emergency equipment.

AVAILABLE MODELS

MAKE	GVWR	Passenger Capacity	SPECIFICATIONS / OPTIONS		
			Model	Wheelbase	Engine Options
SRW	9,900 lbs.	Up to 14	GM	139	Gas 4.8 Liter, 285 bhp

BUILT FOR TODAY, TOMORROW AND NEXT MONTH'S ACTIVITY.

The Minotour is the safe choice for schools, child care centers, churches, activity centers and youth organizations. Inside, the Minotour is spacious and holds up to 30 people. Or it can be easily configured for a wheelchair lift and multiple seating styles. With a full-height entrance door, the interior also offers a wide center aisle, 73 inches of headroom and interior dome lights.

The Minotour has been designed for function and flexibility. It comes equipped with a variety of standard features, including daytime running lights, four-wheel anti-lock brakes and a 42" x 47" glass-paneled rear emergency door. You can also choose from a selection of optional convenience features, like dash and rear air conditioning, an electrically operated front entrance door and remote-controlled, heated mirrors. And the Minotour's seating options provide plenty of added flexibility, even as needs change from year to year.

Optional wheelchair lift with 44" wide door; a variety of rugged lifts are available.

With optional track seating, the floor plan can easily be adapted to suit your changing needs. Passenger seats can be quickly removed to allow for additional wheelchair securements.

VARIOUS SEAT OPTIONS AVAILABLE
