

**Subject:
FS65 Wear
Plate For Floor
Covering Under
Accelerator
Pedal**

**Carolina Thomas Bus Buzz #34
is providing information and
instructions for adding a wear
plate under the accelerator
pedal on FS65's.**

A county reported that the flooring under the accelerator pedal was wearing after years of service. This Service Solution provides directions to add a wear plate. These buses are not under warranty but Carolina Thomas has been given the plates and we will provide these at no charge as well as the repair instructions. Each County will receive these plates with one of your parts shipments.

Service solution SS3 is included here and also available on www.thomasbusonline.com.

BODY

MODEL: FS-65

SUBJECT: ACCELERATOR PEDAL WEAR PLATE INSTALLATION

PAGE: 1 OF 2

INDEX: SS 3

BULLETIN: 2

IMPORTANT: READ ENTIRE PROCEDURE BEFORE BEGINNING.

1. Check the tires and be sure the ignition key is in the "Off" position.
2. Place the wear plate TBB 165869 under the accelerator pedal where it contacts the floor. Center the plate, where contacted by the pedal, at 50% throttle. Mark the hole locations on the floor.
4. Remove the accelerator pedal. Confirm the plate is centered over the pedal wear print in the floor cover.
5. Drill marked locations with a #22 drill (0.157).
6. Install plate using four (4) TBB 69003182 #10 X 0.75 flat head screws.

Service Solution
